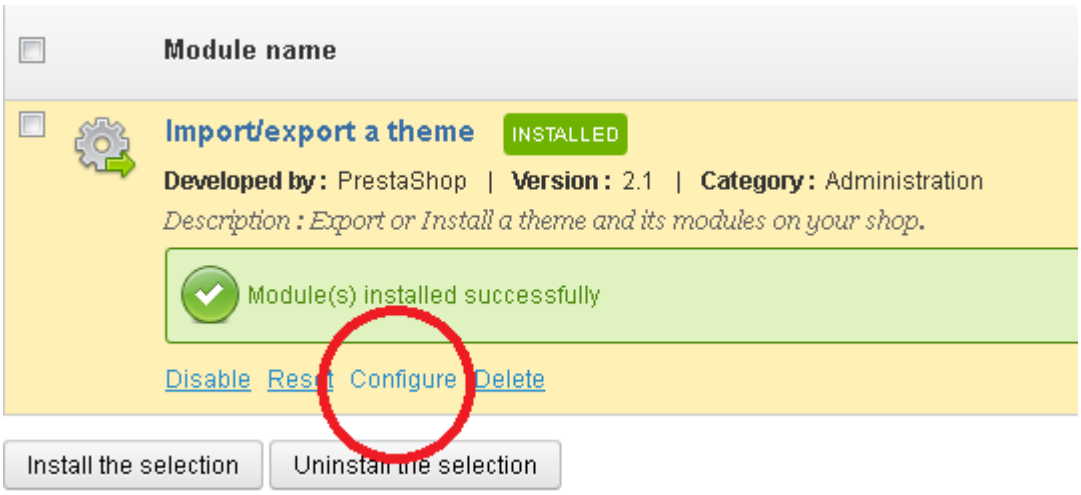
Installation

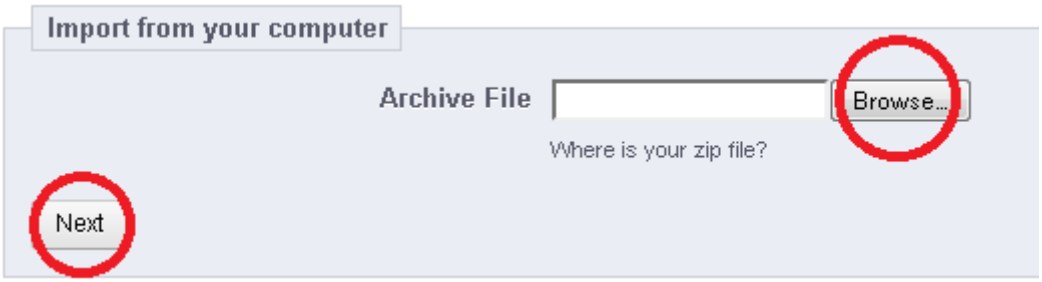
1. **Important! Back up your files and database first.**

2. Open your PrestaShop Back Office (admin) and search for **"Theme Installator"** module.
   (**Note:** Install the module if it's not installed) and Click **"Configure".**

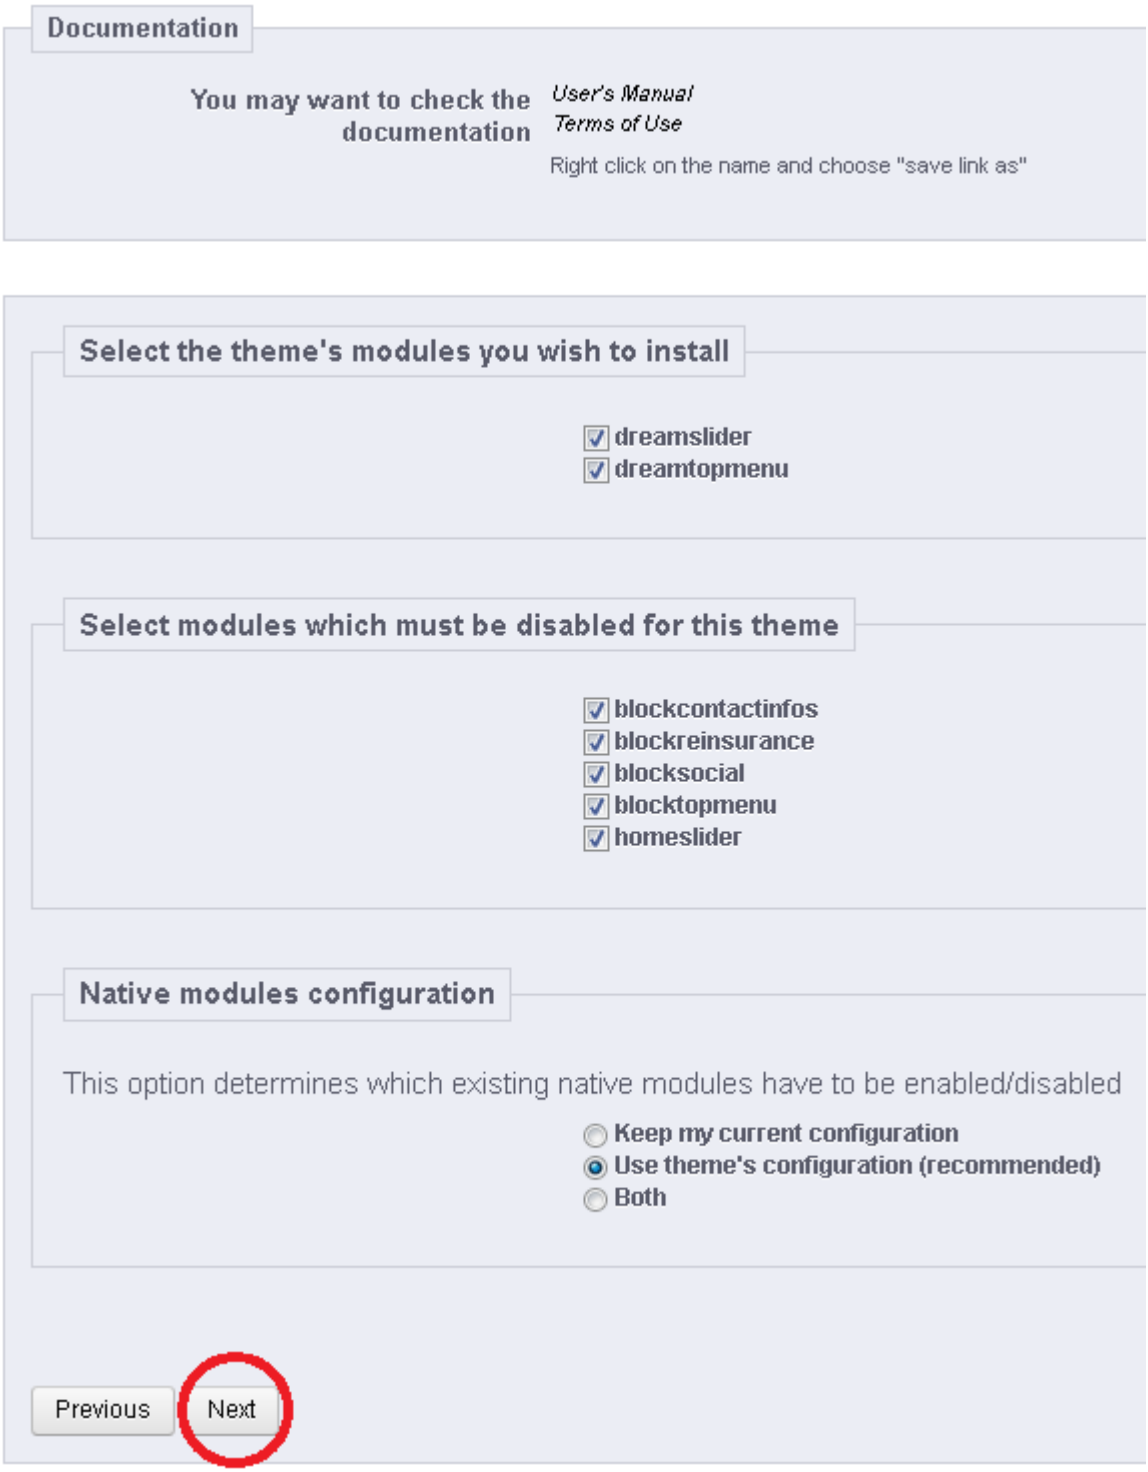


Module name
Import/export a theme
INSTALLED
Developed by : PrestaShop | Version : 2.1 | Category : Administration
Description : Export or Install a theme and its modules on your shop.
Module(s) installed successfully
Disable Reset Configure Delete
Install the selection
Uninstall the selection

3. At the first section "***Import from your computer***" select the theme archive that you have downloaded and click **"Next"**.



4. Follow the process by Clicking **"Next", "Next"** and then **"Finish"**.
   (**Note:** See the picture on the next page)



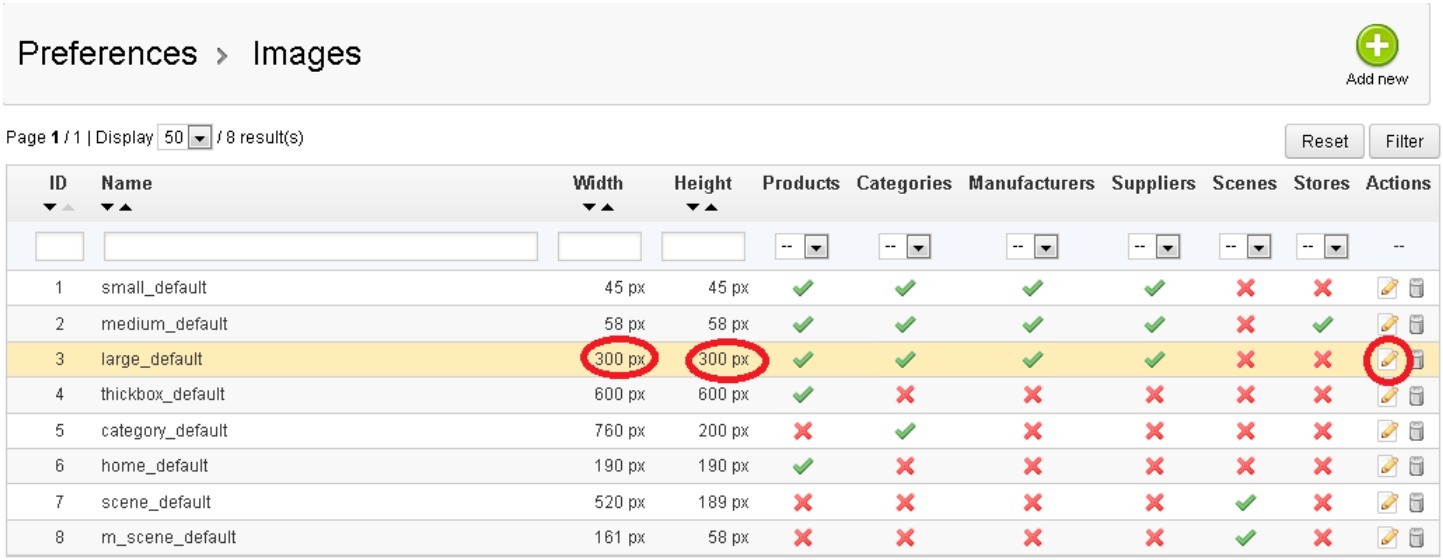
5. That's it you are done with the installation. You now need to configure your new theme, see on the next page.

Configuration

1. Select the new installed theme by going to “**Preferences**” - > “**Themes**” tab. If not selected Click on the check box of the installed theme.

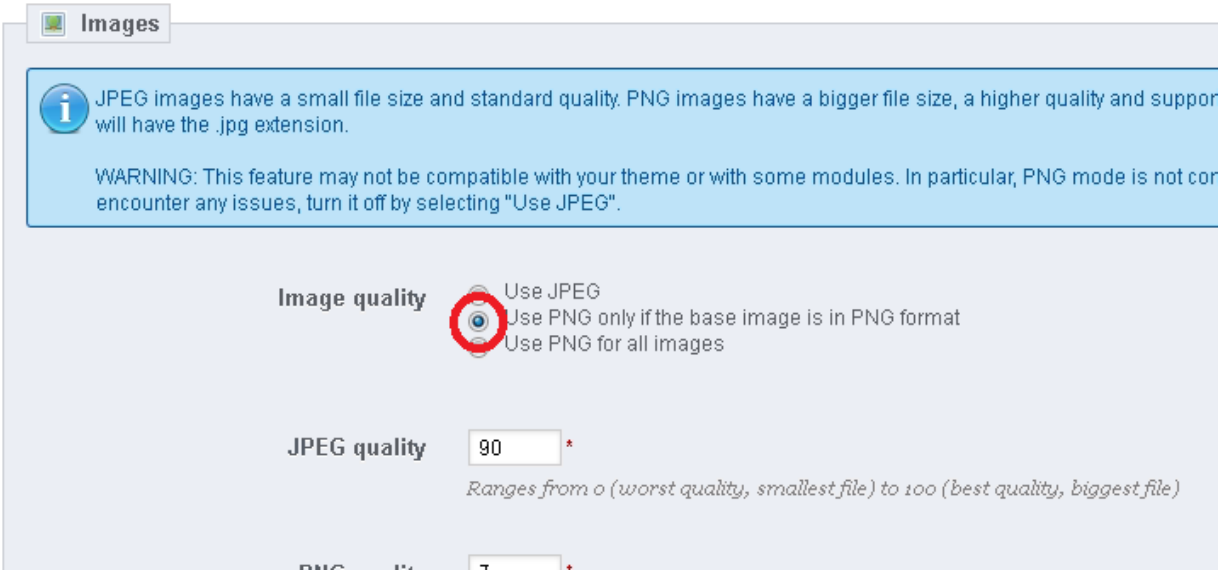
2. **Important!** If needed to change image sizes go to “**Preferences**” - > “**Images**” tab, and make sure to edit **width** and **height** of images to the following values:

Large_dm:	300 px, 300 px
Category_dm:	545 px, 200 px
Home_dm:	135 px, 135 px
Medium_dm:	135 px, 135 px



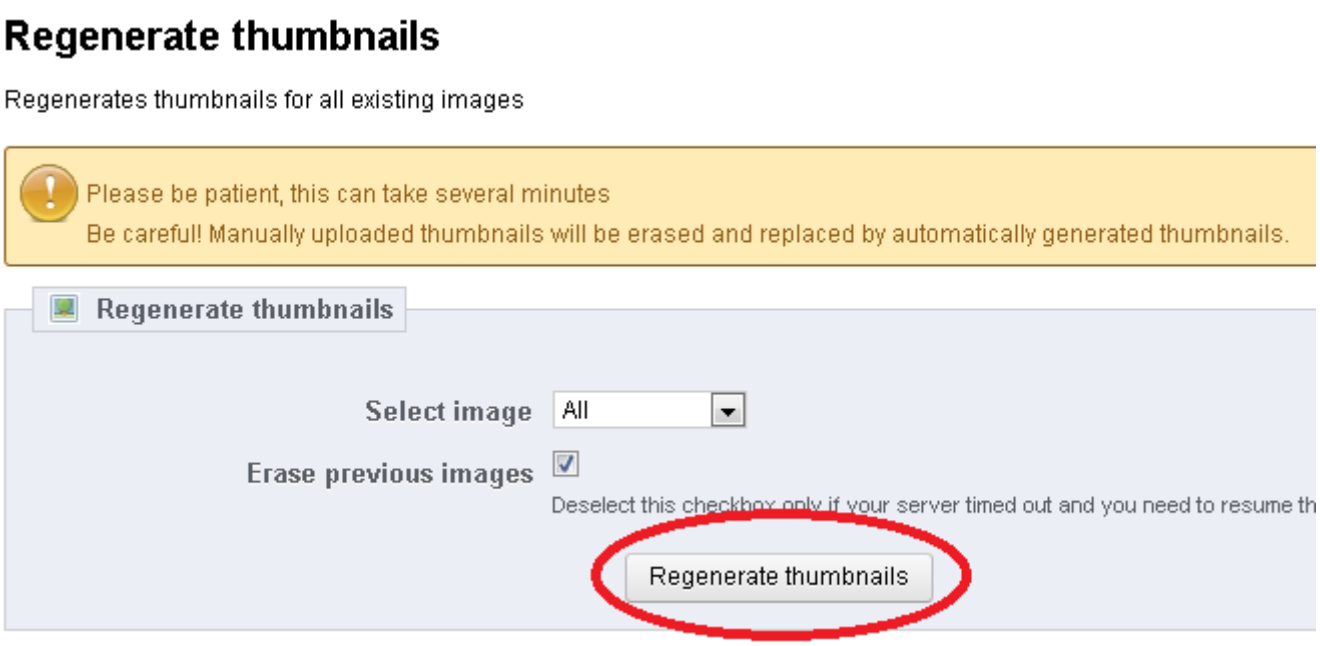
ID	Name	Width	Height	Products	Categories	Manufacturers	Suppliers	Scenes	Stores	Actions
1	small_default	45 px	45 px	✓	✓	✓	✓	✗	✗	
2	medium_default	58 px	58 px	✓	✓	✓	✓	✗	✓	
3	large_default	300 px	300 px	✓	✓	✓	✓	✗	✗	
4	thickbox_default	600 px	600 px	✓	✗	✗	✗	✗	✗	
5	category_default	760 px	200 px	✗	✓	✗	✗	✗	✗	
6	home_default	190 px	190 px	✓	✗	✗	✗	✗	✗	
7	scene_default	520 px	189 px	✗	✗	✗	✗	✓	✗	
8	m_scene_default	161 px	58 px	✗	✗	✗	✗	✓	✗	

3. **Important!** In the following field **“Images”** in the same tab, check option to **“Use PNG only if the base image is in PNG format**”. And Click **“Save”.**



Images
JPEG images have a small file size and standard quality. PNG images have a bigger file size, a higher quality and suppor
will have the .jpg extension.
WARNING: This feature may not be compatible with your theme or with some modules. In particular, PNG mode is not cor
encounter any issues, turn it off by selecting "Use JPEG".
Image quality
Use JPEG
Use PNG only if the base image is in PNG format
Use PNG for all images
JPEG quality
90
*
Ranges from 0 (worst quality, smallest file) to 100 (best quality, biggest file)

4. **Important!** Scroll down to the **“Regenerate thumbnails”** fields on the same page and Click the **“Regenerate thumbnails”** button and wait to finish. This may take some time depending on how many products and images you have.



Regenerate thumbnails
Regenerates thumbnails for all existing images
Please be patient, this can take several minutes
Be careful! Manually uploaded thumbnails will be erased and replaced by automatically generated thumbnails.

Regenerate thumbnails

5. Go back to “**Preferences**” - > “**Themes**” tab. Under the **“Appearance”** field, select your logo and upload it and Click **“Save”.**
Note: Use transparent **PNG** format image for your logo.

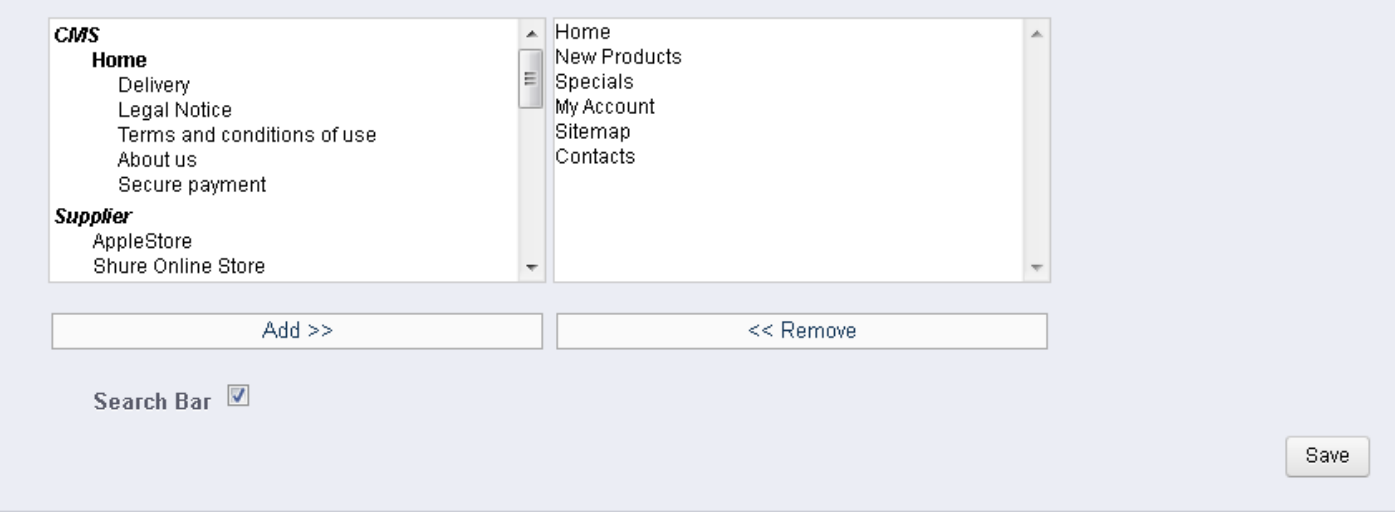
6. That’s it you are done. Checkout working with modules section on the next page.

Working with the modules

Dreamtheme Horizontal Menu (navigation bar)

In general, the usage with this module is the same as the Top Horizontal Menu, native module included in PrestaShop.

To change or configure the links in the Horizontal Menu, go to your PrestaShop Back Office's **Modules** section and search for **"Dreamtheme Horizontal Menu"**. Click **"Configure"**. Now you can configure the links as you like using the interface.

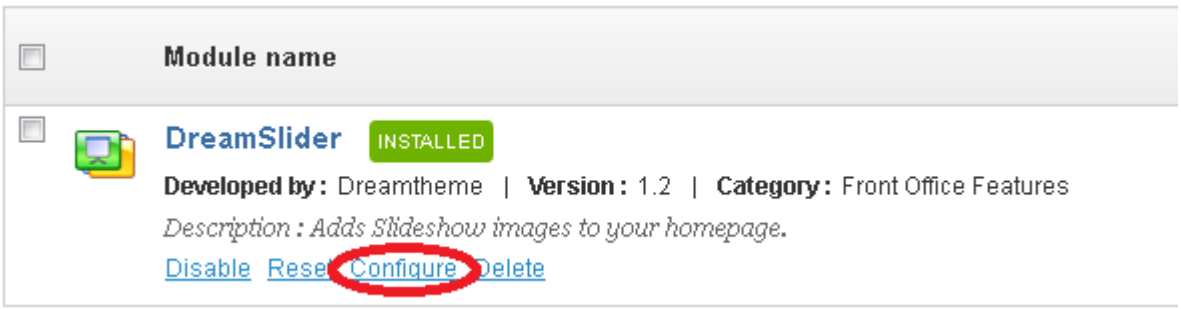


You can remove, add or translate links from here.
If you want to change the module settings to the default links, press **"Reset"** option on the module, in the modules list.

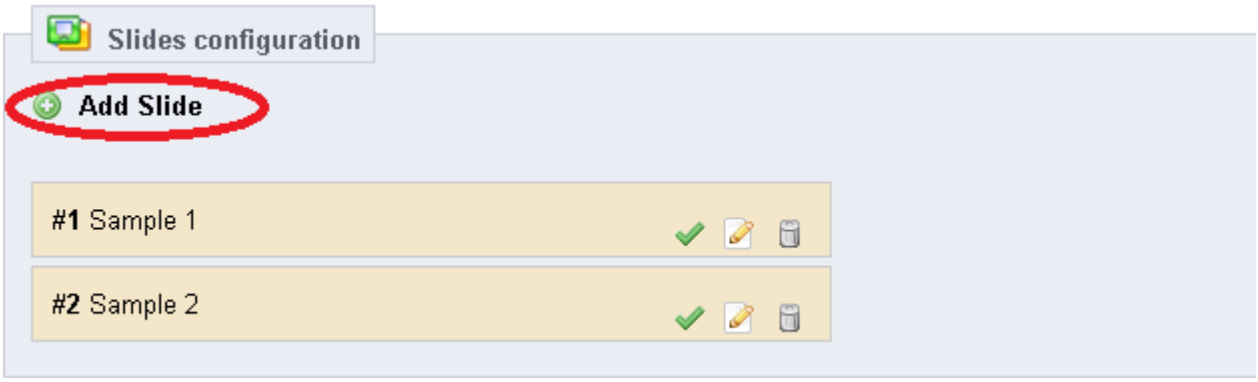
DreamSlider Module

In general, the usage with this module is the same as the HomeSlider, native module included in PrestaShop.

With this module, you can change front page big banner slider images. To do so, go to your PrestaShop Back Office's **Modules** section and search for **"Dreamslider"**. Click **"Configure"**. Now you can configure the links as you like using the interface.



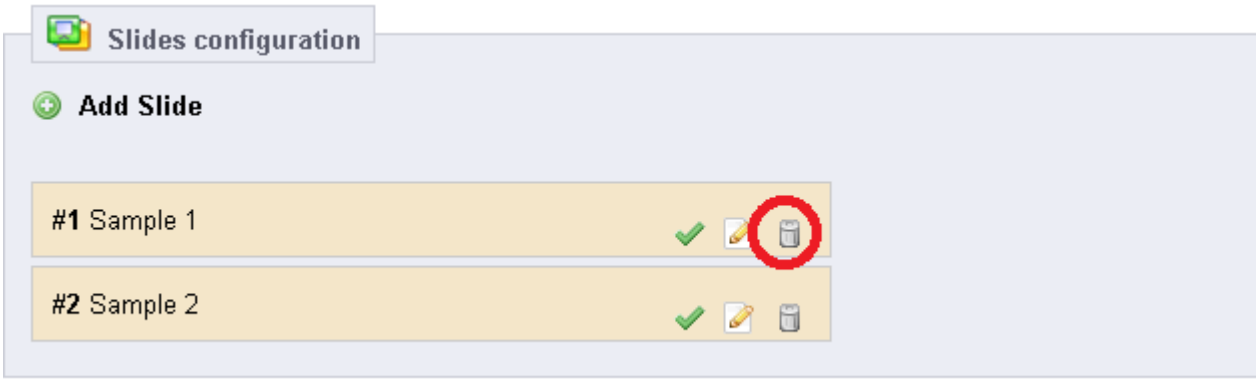
To upload your new Slider Image, Click the button **"Add Slider"** and select your file, and fill the information.



Important! The size of the images for the DreamSlider should be **957x423** pixels to be displayed correctly.

Important! If you want to add Image for a different language, Click the **"Country Flag"** icon to change to that language.

To delete an image from the slider, simply press the **"Trash Can"** icon. If you want to change the positions, **"Drag and Drop"** the sliders to the desired position.



Product Banner

(Advanced knowledge needed)

To configure your Product Banners like on the demo page of this theme, you will need to do the following.

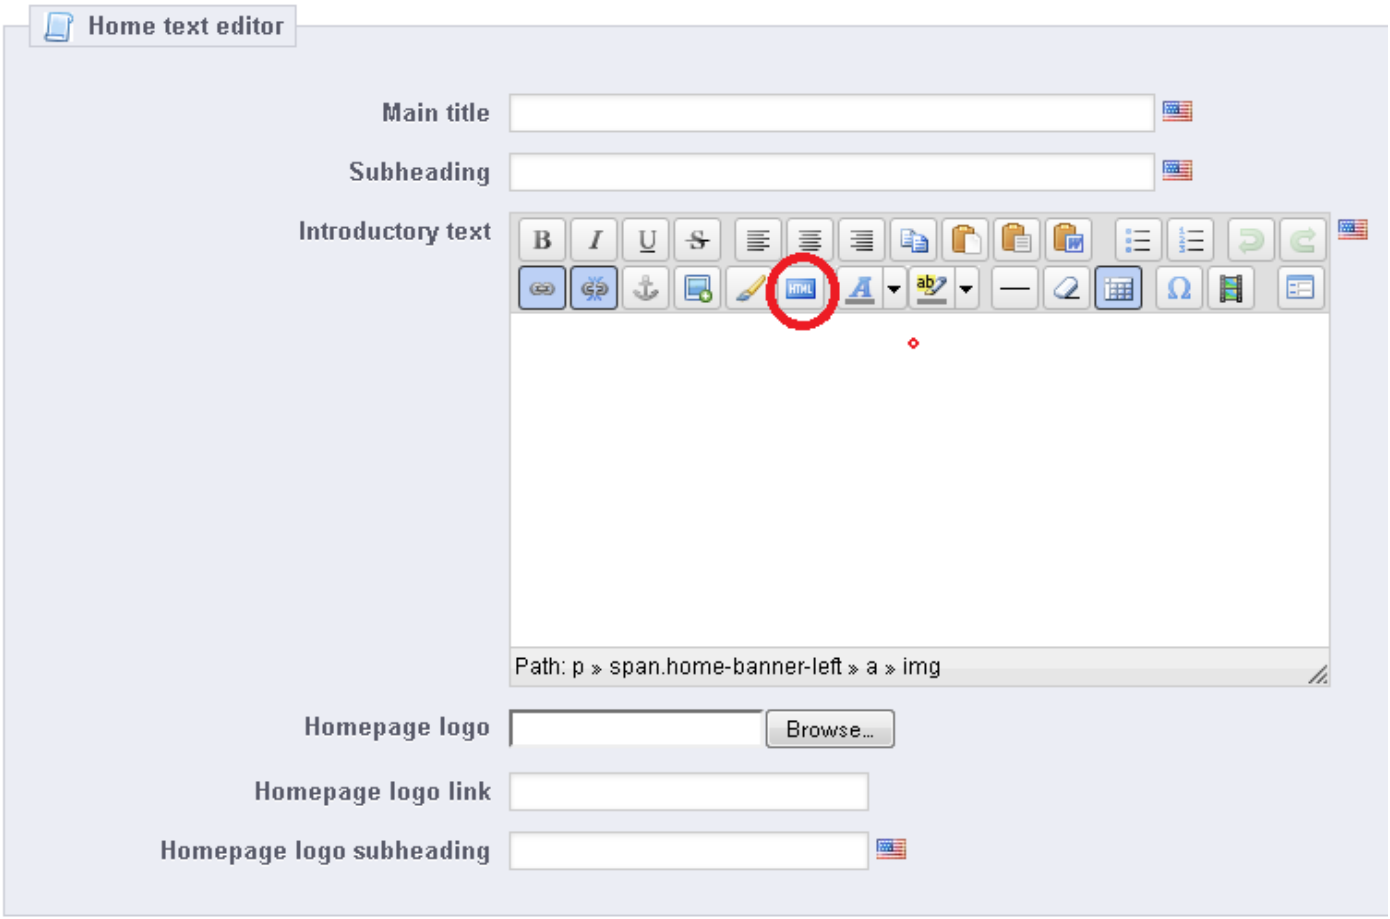
1. Create your banner image with name **"home_banner.jpg"** using our PSD theme file for banner in your assets folder. After you are done with editing, save and upload the image in your **theme folder/img** with exactly the same name.

   (**Note:** You will need PhotoShop software or other suitable for editing our PSD theme)
   (**Note:** The picture file name and size must be exactly the same as our PSD theme; otherwise it will be broken unless you edit the CSS for that)

2. Search for **“Home Text Editor”** module from your **Back Office** -> **Modules**, click **“configure”**.

3. Click **“Image”** icon in the **“Introductory text”** and use the field to upload the two images you just have created.

4. Empty all other fields and click the **“HTML”** icon like it is shown on the picture below:



5. Copy the code below and Paste it into the **“HTML”** field.

6. Edit the code by changing the URL to correspond your file location and your desired links on click.

7. Click **“Update”** and **“Save”** after that and you are done.

8.

Footer Social Links

1. To change the footer links and put your Facebook links or copyright info, go to your theme folder (for example, go to themes/dtheme-blue/ folder) and open the file "**footer.tpl**" with notepad or any HTML editor that you may have.

2. Go to around line 43 of that file and find this code:

   " "

3. And replace the URL "http://www.facebook.com" with your Facebook link. Repeat this step with the other links.

```
<div id="footer">
    <h4>{l s='Follow Us'}</h4>
       <ul style="text-align:left; list-style:none; padding-top:25px;">
         <li>
         <a href="http://www.facebook.com"><img src="{$img_dir}/icon/facebook.png" alt="Faceboo
         <a href="http://www.twitter.com"><img src="{$img_dir}/icon/twitter.png" alt="Twitter"
         <a href="http://www.youtube.com"><img src="{$img_dir}/icon/youtube.png" alt="Youtube"
         <a href="http://www.rss.com"><img src="{$img_dir}/icon/feed.png" alt="RSS Feed" id="fo
         </li>
       </ul>

       <h4 style="text-align:left; list-style:none; padding-top:10px;">{l s='We Accept'}</h4>
       <ul style="text-align:left; list-style:none; padding-top:15px;">
         <li>
         <img src="{$img_dir}/icon/cards.png" alt="Credit Cards we accept" id="footer_icons"/>
         </li>
       </ul>
</div>
```

Note: Don't forget "http://" in front of your URL and save.

Footer Copyright information

1. To change the copyright info link while still open **footer.tpl** go to around line 97 and change " {l s='Your Company Copyright'} " with your copyright info by replacing the name.

Important! Remember to enable **"force compile"** function once in the Back Office in order to see the changes in the footer, and if needed clear your browser and PrestaShop cache.

```
      </div>
      <div id="footer-bottom">
      <p><strong>{l s='Your Company Copyright 2012'}</strong></p>
      </div>
        </div>
        {/if}
    </body>
</html>
```

Upgrading from old versions

If you are upgrading this theme from 1.4.x series versions of PrestaShop, **we strongly recommend** making a clean install of PrestaShop and importing your data in it. If that is not possible you should do the following.

1. Backup your theme changes to a different location.

2. Delete the folder **"themes/dtheme-blue"**

3. Delete the modules **"Blocktopmenu", "Slideric", "Homefeatured2"**

4. After that, start the install process explained in this User's Manual.

Translating the theme in not included languages

You can translate this theme to any language you want. To do so you need to do the following:

1. Import your language file in PrestaShop, or use PrestaShop Translation option.
Note: Find detailed steps about that in PrestaShop's documentation.

2. Translate the Navigation Links by edit the links in the **"Dreamtheme Horizontal Menu"**
Note: See working with modules.

3. Translate via the PrestaShop Translation option the module **"Home Featured".**

4. If you need for back office use, translate the module **"DreamSlider"** in PrestaShop Translation page and that's it.

Frequently asked questions

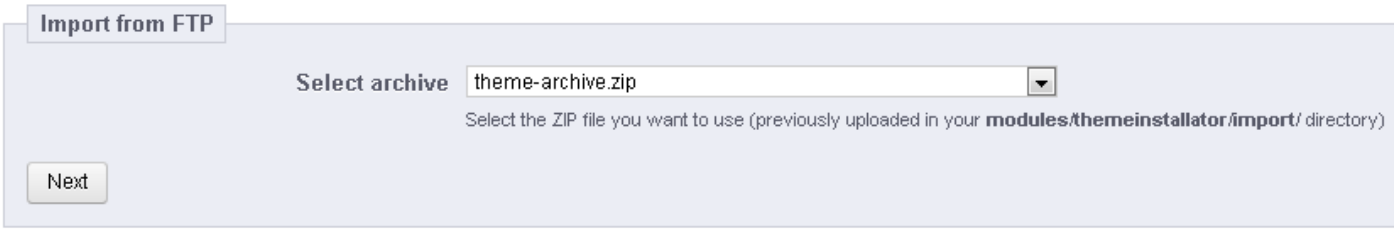
Q. **I can't install the theme via theme installer from PrestaShop, what to do?**

A. This is due to wrong permission's from your hosting or PrestaShop installation or PHP file upload limit settings. You can manage the appropriate permission's or use alternate method below or you can install the theme manually (not recommended).

Method 1

1. To install the theme via alternative method, simply upload your theme archive via FTP to PrestaShop installation folder in **"modules\themeinstallator\import"**.

2. After that start the Theme installer again, and choose the last option **"Install from FTP"** you should see your theme archive as an option there. See the picture below.



Import from FTP
Select archive
theme-archive.zip
Select the ZIP file you want to use (previously uploaded in your modules/themeinstallator/import/ directory)
Next

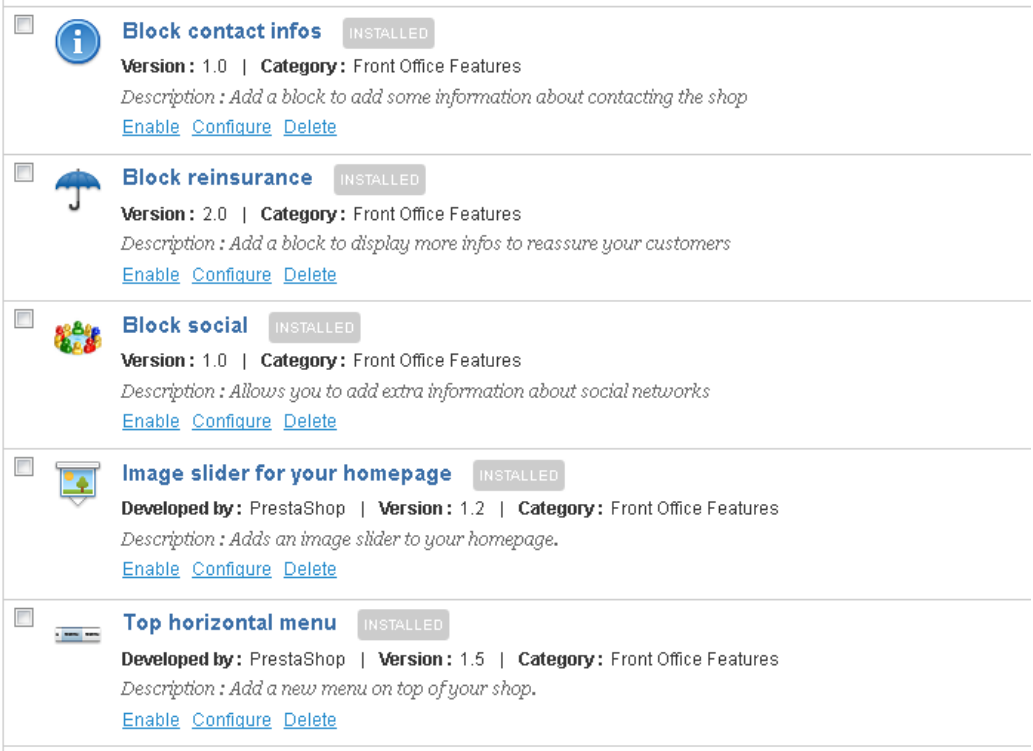
3. From there just continue as shown in the normal installation.

Method 2 (Manual Installation)

1. Copy the modules folders from downloaded theme archive and upload them to your module directory on your server where the PrestaShop installation is.

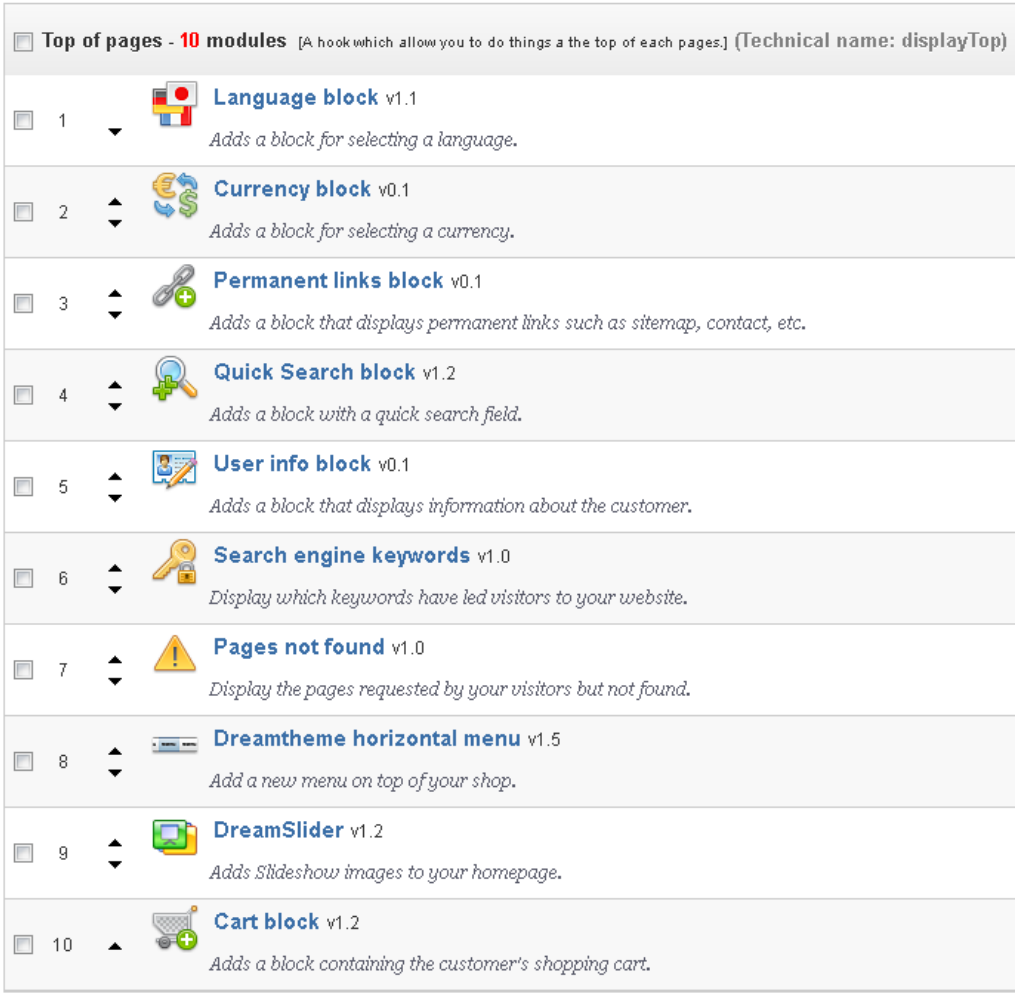
2. Copy **"Dtheme-blue"** theme folder from the themes folder in the archive and upload it to your PrestaShop theme folder.

3. After that disable the following modules in your PrestaShop. Check the picture on the next page.



Block contact infos INSTALLED
Version : 1.0 | Category : Front Office Features
Description : Add a block to add some information about contacting the shop
Enable Configure Delete
Block reinsurance INSTALLED
Version : 2.0 | Category : Front Office Features
Description : Add a block to display more infos to reassure your customers
Enable Configure Delete
Block social INSTALLED
Version : 1.0 | Category : Front Office Features
Description : Allows you to add extra information about social networks
Enable Configure Delete
Image slider for your homepage INSTALLED
Developed by : PrestaShop | Version : 1.2 | Category : Front Office Features
Description : Adds an image slider to your homepage.
Enable Configure Delete
Top horizontal menu INSTALLED
Developed by : PrestaShop | Version : 1.5 | Category : Front Office Features
Description : Add a new menu on top of your shop.
Enable Configure Delete

4. You also will have to configure positions of modules and configurations. Check the picture below:



Top of pages - 10 modules [A hook which allow you to do things a the top of each pages.] (Technical name: displayTop)
1 Language block v1.1
Adds a block for selecting a language.
2 Currency block v0.1
Adds a block for selecting a currency.
3 Permanent links block v0.1
Adds a block that displays permanent links such as sitemap, contact, etc.
4 Quick Search block v1.2
Adds a block with a quick search field.
5 User info block v0.1
Adds a block that displays information about the customer.
6 Search engine keywords v1.0
Display which keywords have led visitors to your website.
7 Pages not found v1.0
Display the pages requested by your visitors but not found.
8 Dreamtheme horizontal menu v1.5
Add a new menu on top of your shop.
9 DreamSlider v1.2
Adds Slideshow images to your homepage.
10 Cart block v1.2
Adds a block containing the customer's shopping cart.

5. And then go to the configuration steps and do the needed configurations. That's it.

Q. **My header is displaced, what to do?**

A. If you did not modified anything, probably you are using too big Logo image. Use smaller Logo image or you have miss configured modules position, see section manual install for proper modules positions.

Q. **I have edited, modified CSS, TPL or other files, and now I have a problem, what to do?**

A. You can reinstall your theme and start your modifications again. However edit your theme on a different installation and not on a live store, when you are satisfied with the result, then apply it on your live store.

Q. **Will you help me with custom module, or code on my store?**

A. No! Our support doesn't cover user's customizations or modifications or any 3rd party modules or code.

Q. **Will you help me with native PrestaShop modules configuration or how to work with them?**

A. No! Our support only covers this theme. PrestaShop has their own support, documentation, user's manual and forums check them out.

Q. **PrestaShop has new version, will I get new version of the theme?**

A. There is no guarantee that we will update certain theme with the latest PrestaShop version. This depends mainly on the changes in the new versions of the PrestaShop and other factors.
If there is a new version of the theme, you can download it from your addons account, or you can contact us at support@dreamtheme.eu providing your order date and name used on the order and we will send to you the new version if available free of charge.
